Final Year Project: INOVO is a bike-sharing solution addressing Lahore's air pollution by promoting sustainable cycling at UET Lahore, Punjab's second-largest university. A [top-10 finalist](#) in the ADB CAREC University Startup Generator Challenge (out of 168 teams), INOVO aims to reduce carbon emissions and foster a cycling culture.

WORK EXPERIENCE

Product Designer

SmartEnds | Belgium

July 2023 - Feb 2025

As a Product Designer, I spearheaded the end-to-end design and delivery of 15+ complex digital platforms, including 5 client-critical IoT systems monitoring over 1,000 devices. I utilized Figma for main product development, building scalable design systems and intuitive interfaces for AI and sensor-based applications. For marketing-driven initiatives, I leveraged Webflow to design and launch high-performing websites that streamlined the development workflow. By aligning these design strategies with business objectives, I created a strategic prototype for a key proposal that secured a 60% client conversion rate and directly generated 30% of quarterly sales. Additionally, I facilitated close collaboration with cross-functional teams, implementing handoff processes that reduced delivery friction and technical debt by 40%.

Product Intern

VentureDive | Lahore

Jun 2023 - July 2023

Serving as the Scrum Lead, I oversaw the development of the "Learn to Recite Quran" feature for the Islamic Finder app. I managed backend development sprints and coordinated cross-functional efforts to ensure a seamless user experience. These efforts streamlined the production workflow and directly assisted in resolving 60% of technical support tickets

Product Manager Intern

OpenAIMP | Remote

Jun 2022 - Nov 2022

In my role as Product Manager, I spearheaded the UI/UX research and end-to-end lifecycle of a FinTech application. I led multidisciplinary teams of developers and designers to align the product interface with user needs and industry standards. This collaborative approach ensured the successful delivery of a user-centric product within the specified scope and schedule
