

MOIZZA AZHAR · PRODUCT DESIGNER

Designs that work, *and know it*

Product designer working across IoT, AI and fintech. HCI master's student at Université Paris-Saclay, currently in Orsay, France, and open to March 2027 internships.

that's me, probably iterating

Engineer by training, *designer by conviction*

I'm a product designer based in **Orsay, France**, doing a master's in Human-Computer Interaction at **Université Paris-Saclay**. I came in through a computer science degree at UET Lahore, which is why I treat engineering constraints as a design input rather than an obstacle.

For two years at **SmartEnds** I designed 15+ digital platforms, including five client-critical IoT systems monitoring over a thousand devices. That work is where I learned the thing I now care about most: **dense, technical data is a design problem, not an excuse**.

What I'm good at: taking something complicated and structured, sensor networks, financial flows, multi-step onboarding, and finding the shape that makes it obvious. I build design systems that survive contact with real engineering teams, and prototype early enough that the arguments happen in Figma instead of in production.

CURRENTLY

HCI master's	Paris-Saclay
Based in	Orsay, FR
Looking for	Mar 2027 roles

PREVIOUSLY

SmartEnds	2023 to 25
VentureDive	2023
OpenAIMP	2022
