

Moizza Azhar

Product Designer

Summary

Product Designer and HCI Master's student who turns complex technology into intuitive, human-centered experiences. Two+ years leading cross-functional teams to ship scalable IoT, AI, and Fintech products – driving a 60% jump in client conversion through sharp, strategic prototyping.

Info

Location

Orsay, France

Skills

Figma, Sketch, Webflow, Adobe Photoshop, Adobe Illustrator, Fusion 360, Unity, AR, VR, Blender, Interaction Design, User Interface, User Experience, Service Design, Design Thinking, User Research, Prototyping

Certificates

Agile Meets Design Thinking
Principles of UX/UI Design
Foundations of UX Design

Achievements

Top Performer – UX Batch 1.0

ZAPTA Technologies

Intern of the Month

OpenAIMP

Winner – UX Hands-on Workshop 2024

Dairah x Friends of Figma

Education

M1 & M2, Human-Computer Interaction

Université Paris-Saclay | Orsay, France

Aug 2025 – Aug 2027 (exp.)

M1 result: 15.63/20. *Courses:* Design of Interactive Systems, Evaluation of Interactive Systems, Interactive Machine Learning, Fundamentals of Extended Reality, Situated Interaction, Serious Games, Advanced Design of Interactive Systems, Programming of Interactive Systems, The Art of Fabricating Tangible Interfaces, Advanced Immersive Interactions.

BSc Computer Science

UET Lahore | Pakistan

Oct 2019 – Aug 2023

GPA: 3.51/4. *Final Year Project (INOVO):* a campus bike-sharing platform designed to cut short-distance vehicle trips and reduce air pollution at UET Lahore – a top-10 finalist (of 168 teams) at the ADB CAREC University Startup Generator Challenge.

Work Experience

HCI Research Intern

Inria, Université Paris-Saclay | France

May 2026 – Aug 2026

- Brainstormed and video-prototyped concepts for La Suite numérique, a French government digital services platform, supervised by Wendy Mackay.
- Contributed to ideation for the DOIT book, authored by Wendy Mackay, exploring more flexible ways for different types of users to access it.

Product Designer

SmartEnds | Lahore

Jul 2023 – Feb 2025

- Led end-to-end design on 15+ digital platforms, including 5 client-critical IoT systems monitoring 1,000+ devices, using Figma to build scalable design systems.
- Built a strategic prototype for a key client proposal that secured a 60% conversion rate and directly generated 30% of quarterly sales.
- Partnered with developers, PMs, and QA to standardize handoff, cutting delivery friction and technical debt by 40%.

Projects

Reso – Design Project 2

Led a 5-person team designing Reso, a videoconferencing interface visualizing emotion through color-coded captions and sound-rhythm graphs for Deaf and Hard-of-Hearing users, validated via an 18-participant study.

Color-AI-t – Advanced Design of Interactive Systems

Designed a pen-based AI coloring-page generator with a 5-person team, running story interviews and a comparative user study to validate a redesigned drag-and-drop AI canvas.

OrchID – Situated Interaction

Reimagined breakout rooms as an interactive spatial canvas with a 4-person team, designing direct-manipulation controls grounded in HCI substrate principles.

Pinjara Kari – The Art of Fabricating Tangible Interfaces

Reimagined traditional “pinjara” latticework through modern 3D fabrication at the Université Paris-Saclay FabLab, designing a modular, one-square-meter installation with precise press-fit joints.
